

TPG-F 4300

FIXED FENCE BARRIER

**GENERAL INFORMATION**

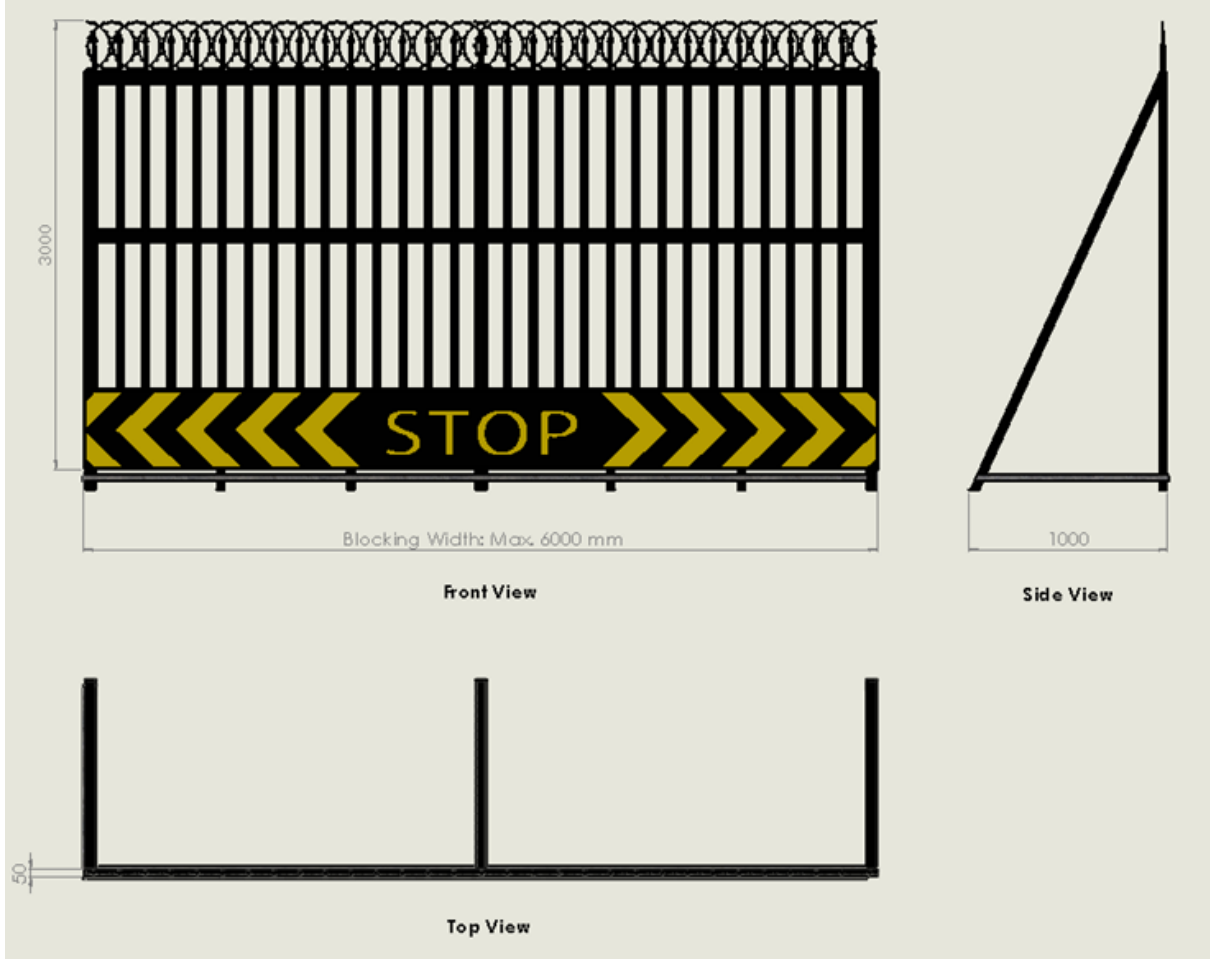

TPG-F series fence systems are designed to present perimeter security depending on the requirements. TPG-F series is designed to stand in perfect harmony with sliding and swing gates. TPG-F series are preferred due to their easy installing and cost-effectiveness features, compared to concrete walls and other structures.

Designs can be customized according to security requirements with a variety of material and color options, decorative designs and gate dimensions. Different types of spears, barbed tapes and razors can be used to increase the level of security.

MAIN CHARACTERISTICS

- With its modular structure, the system provides ease of disassembling, transportation and installation,
- Thanks to its robust structure with fine-crafted, high graded materials, the fence system provides durability in harsh environmental conditions,
- 6.00 meters of maximum fence width,
- Have an aesthetic and elegant design.
